

## Abrasives

The **Profix abrasives** are premium-grade products tailored for professional sanding tasks. Specifically designed for sanding epoxy and acrylic coatings as well as removing old paintwork, these abrasives are optimized for mechanical grinders with integrated dust extraction systems. Moreover, they seamlessly complement tools compatible with dust extraction system attachments.

Crafted with a film-glued disc, these abrasives maintain their shape without deformation, ensuring exceptional durability throughout extended use.

| PACKAGING  |                      |
|--|----------------------|
| Gradation  | Collective packaging |
| P40, P60   | 50 pcs.              |
| P80, P120, P150, P180, P220, P240, P280, P320, P360, P400, P500, P600, P800, P1200, P1500, P2000 | 100 pcs.             |

reusable

### APPLICATION

**P40/ P60/ P80/ P120/ P150/ P180/ P220/ P240** - substrate preparation for primers, preparatory work, substrate preparation, stripping of old coatings, corrosion removal, putty work, sanding of old coatings

**P280/ P320/ P360/ P400/ P500/ P600/ P800** - treatment of primers and old coatings for the purpose of topcoats preparation

**P1200/ P1500/ P2000** - removal of paint defects, runs, contamination and preparation for polishing with the **PROFIX POLISHING SYSTEM**

### ADJUSTMENT

compatible with multiple grinding systems (Velcro)
