

Fast

Polishing paste 1

FAST Polishing Paste is a robust cutting polishing compound designed to effectively eliminate remove, scratches, and abrasive marks. Its straightforward application makes it especially recommended for swift and efficient work. Compatible with both pad and polishing flexipads, **FAST** paste delivers optimal results without the use of silicone.

Conveniently available in 1-Litre tins, **FAST** Polishing Paste provides a practical solution for various polishing tasks, ensuring a quick and effective approach to achieving a high-quality finish.
