

## CP 075

### 2K very slow thinner

**CP 075**, the refined solution for precise viscosity control in 2K products, clearcoats, and paints. As a slower version compared to **CP 070**, it offers a gradual adjustment perfect for varied temperatures and repair ranges, especially excelling in temperatures over 30°C. Available in 1-Litre containers for user-friendly viscosity adjustments, **CP 075** ensures optimal performance in diverse painting applications.

PACKAGING	
Volume	Collective packaging
1 l	6 pcs.
5 l	4 pcs.

EFFICIENT

LONG SHELF  
LIFE

FOR 2K PRODUCTS

SLOW THINNER

#### TEMPERATURE RANGE

30-40°C

#### APPLICATION

- clearcoats
- **ACRYL** and **LV CRYL**
- acrylic primers
- epoxy primers

#### POT LIFE

Ready-to-use product

#### MINIMUM SHELF LIFE

24 months in originally sealed packaging

#### EVAPORATION TIME AFTER APPLICATION

It increases evaporation time for 2K products
