## WLS 02 WLS 03

Available colours

### Special colour additives

**WLS** are innovative color additives designed to create striking and unique visual effects. These products are specifically developed for waterborne mixing systems and can be used to reproduce challenging colors from brands like Mazda. The **WLS** line consists of two distinct mixes, offering a creative way to enhance individuality and achieve remarkable finishes. Designed to surprise and captivate, **WLS** brings advanced color technology to any paint system.

Available in 0,25-liter tins, it is a versatile solution for both custom and professional applications.
